Number of employees	Over 200
Executive directors	Director general – B. Sharov Technical director – I. Danilov
Development department	Following the long tradition Dr.Web software is developed in St. Petersburg. The development department is headed by Igor Danilov. Anti-virus products by Doctor Web are available for the wide range of operating systems and compatible applications.
Virus monitoring service	The global virus monitoring service collects samples of malicious programs all over the Internet. Updated are provided by several servers located in different parts of the globe. A hot update is released immediately after a new threat has been discovered and analyzed. Virus databases are updated as often as once or twice per hour.
Technical support	Experienced support engineers of Doctor Web support customers in Russian, English, German, French and Japanese.
Distribution of products	Doctor Web doesn't sell anti-virus products to end-users directly. All anti-virus applications and solutions are available from partners of the company.
